

APPLICATION TAPE PAPER – HIGH TACK

INTERCOAT Product-Nr.: 2400

Productinformation

Application Tape based on a special impregnated paper with low tensile elongation and high wet strength.

Suitable for transferring self adhesive letters produced from cast and calendered PVC colored films according to CAD/CAM techniques.

Especially to be emphasised are the following properties:

- The natural rubber adhesive guarantees an excellent adhesion on PVC films because of the relatively high coating weight.
- The impregnated carrier paper shows an excellent stability of shape, with no curl even under moist conditions.
- Based on the tape translucence, the alignment – even of small letterings and logos is simplified.
- The Application Tape can be rewound easily from the roll.

Technical Data

Carrier: Special paper, impregnated

Adhesive: Natural rubber

Adhesion [N/cm]: 2,20 +/- 10 %

Thickness [mm]: 0,10 +/- 5 %

Standard Dimension

1,22 m x 100 m
